A FACELIFT WITHOUT SURGERY

## As we age, unfortunately so does our skin.

As skin ages the fibres within the dermal layers start to lose their uniform structure and become more irregular and sparse. Collagen helps keep skin plump and firm, but the body produces less each year causing skin to lose its elasticity. Fine lines and wrinkles begin to form and skin loses its youthful appearance.

But don't despair!

## Our new treatment offers a solution

Collagen Lift™ uses radio frequency technology to stimulate the production of new collagen and the realignment of elastin fibres deep within the skin, tightening and strengthening the skin and tissue.

With Collagen Lift™ it is no longer necessary to go under the knife to lift, refresh and tighten the skin. Zero down time. Just amazing firm, plump and fresh skin.

## **Growing celebrity following**

Collagen Lift™ is the latest non-surgical treatment looking to replace Botox™ as the wrinkle remover of choice. The treatment tightens and tones, to regain youthful, glowing skin, without the telltale frozen stare of Botox™. Growing numbers of the rich and famous (including Kylie, Amanda Holden, Kim Kardashian and Mel B) are choosing non-surgical radio frequency technology over traditional more invasive treatments. Collagen Lift™ harnesses this technology to deliver great long lasting results.

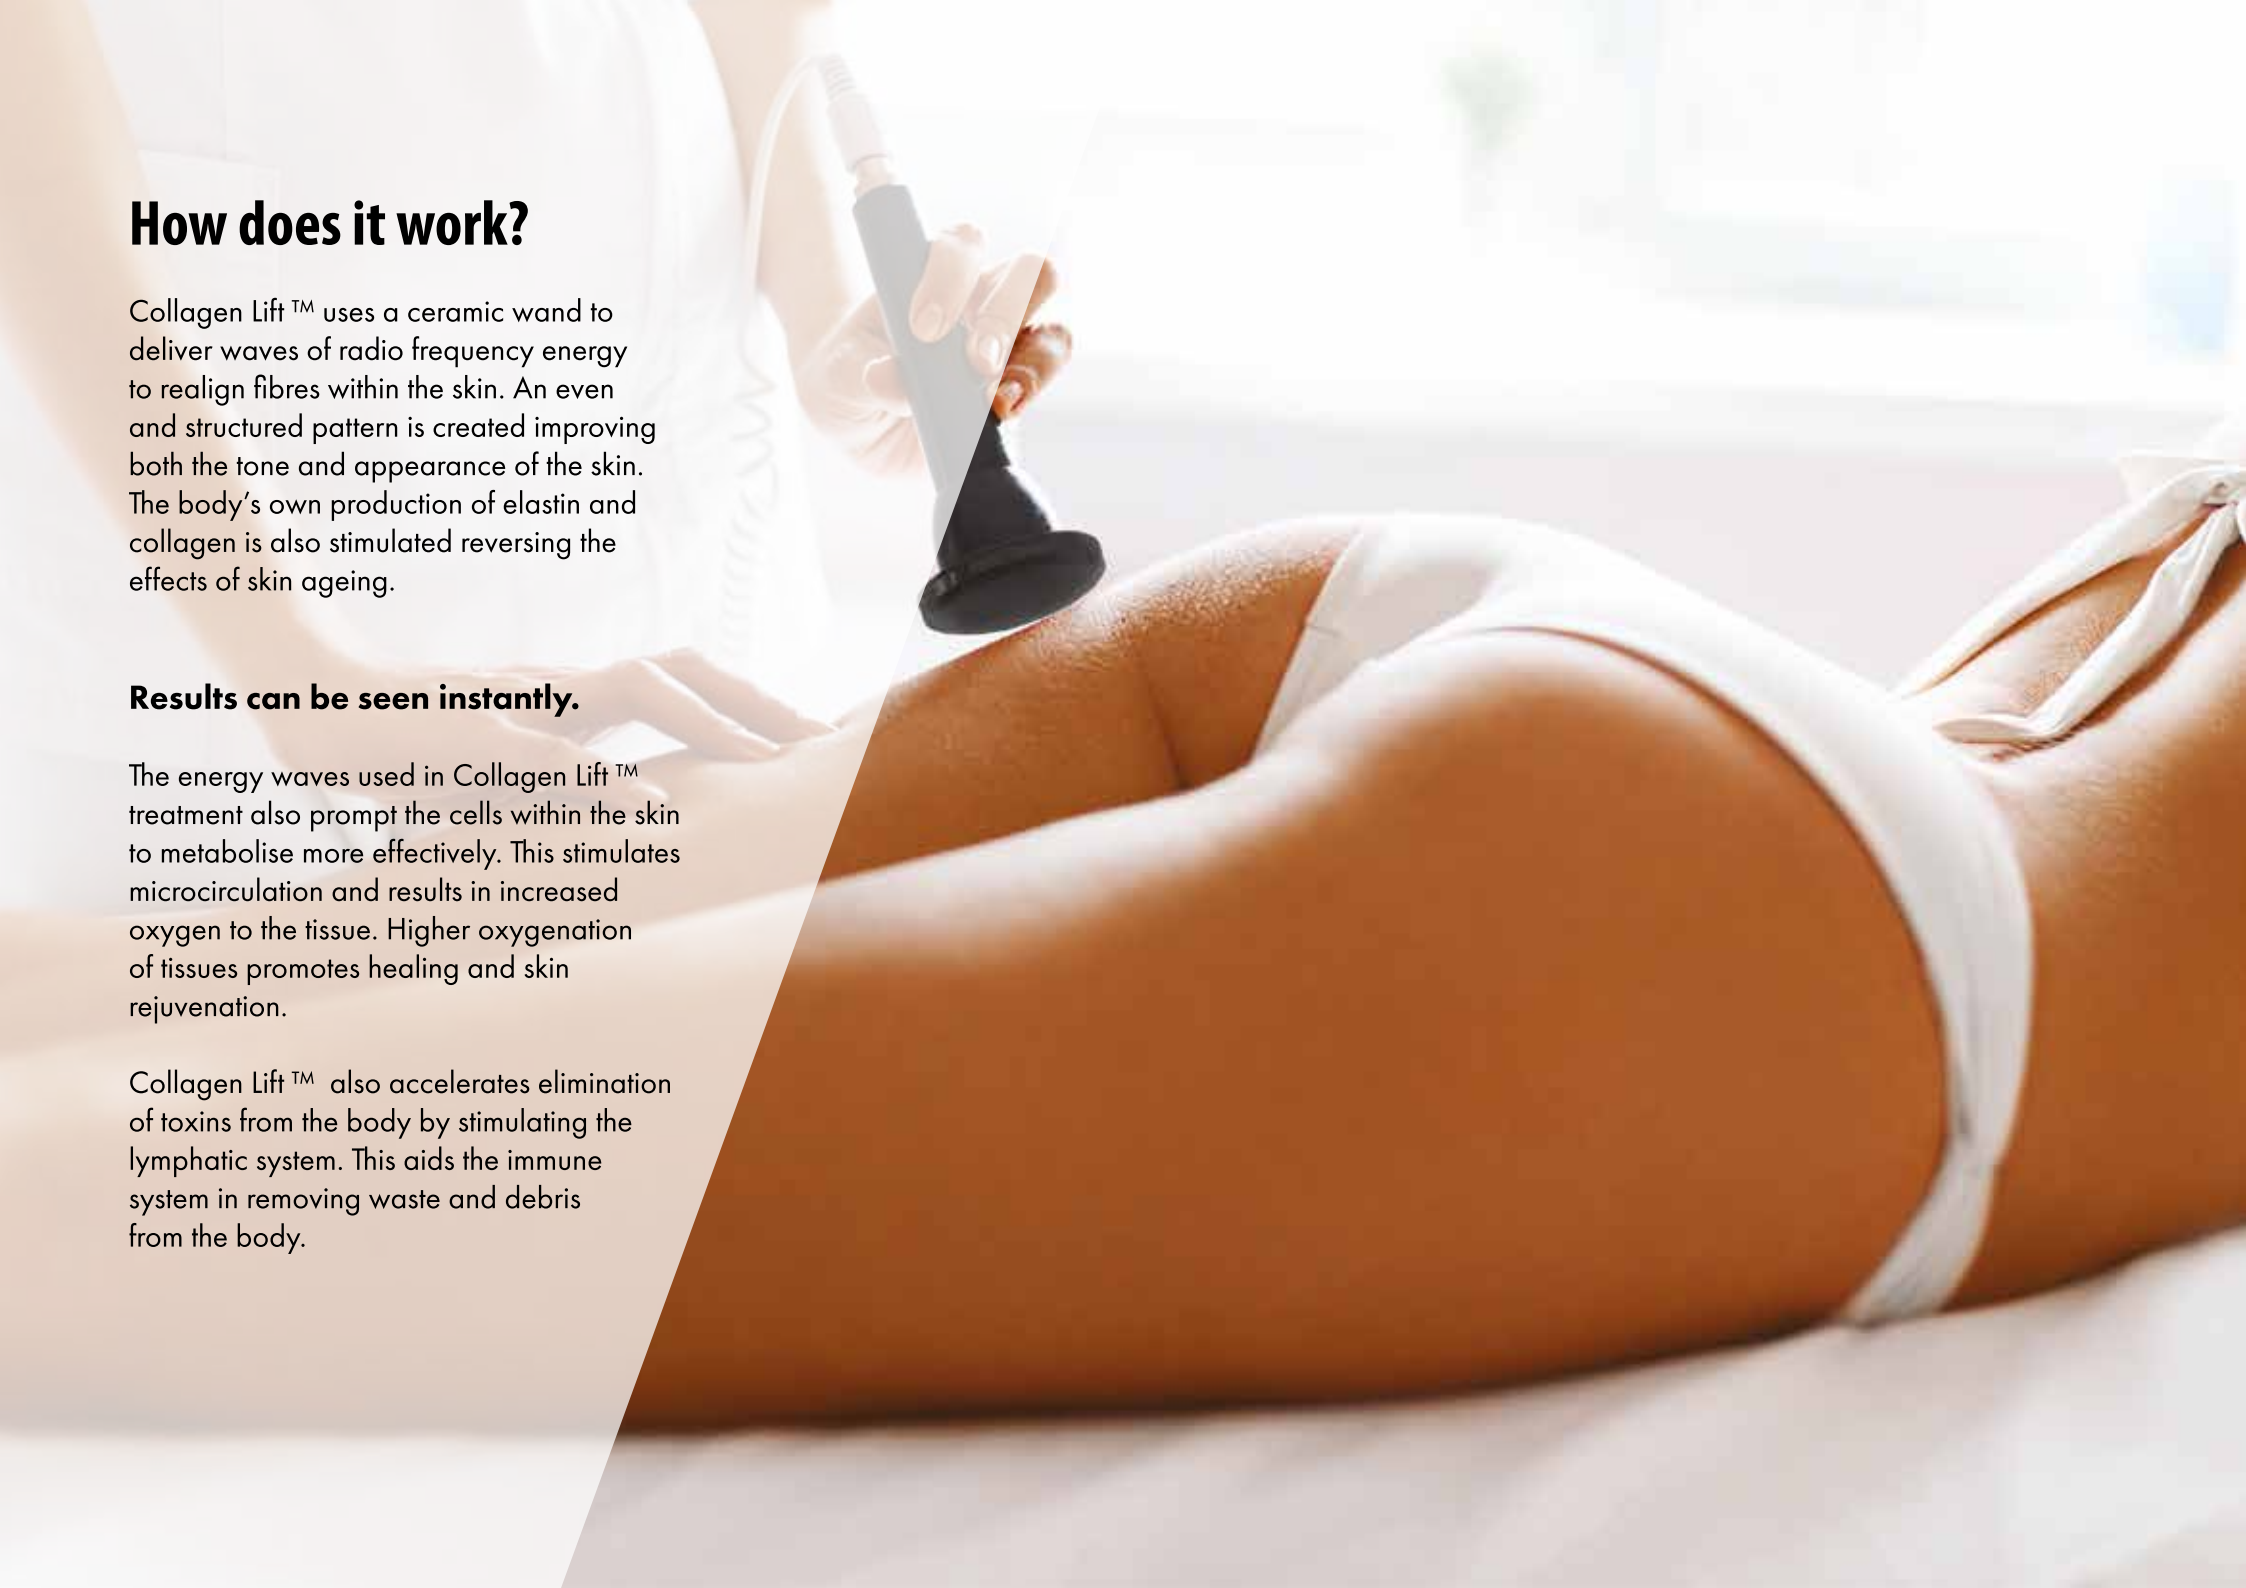

## How does it work?

Collagen Lift™ uses a ceramic wand to deliver waves of radio frequency energy to realign fibres within the skin. An even and structured pattern is created improving both the tone and appearance of the skin. The body's own production of elastin and collagen is also stimulated reversing the effects of skin ageing.

## Results can be seen instantly.

The energy waves used in Collagen Lift™ treatment also prompt the cells within the skin to metabolise more effectively. This stimulates microcirculation and results in increased oxygen to the tissue. Higher oxygenation of tissues promotes healing and skin rejuvenation.

Collagen Lift™ also accelerates elimination of toxins from the body by stimulating the lymphatic system. This aids the immune system in removing waste and debris from the body.

## Long lasting results

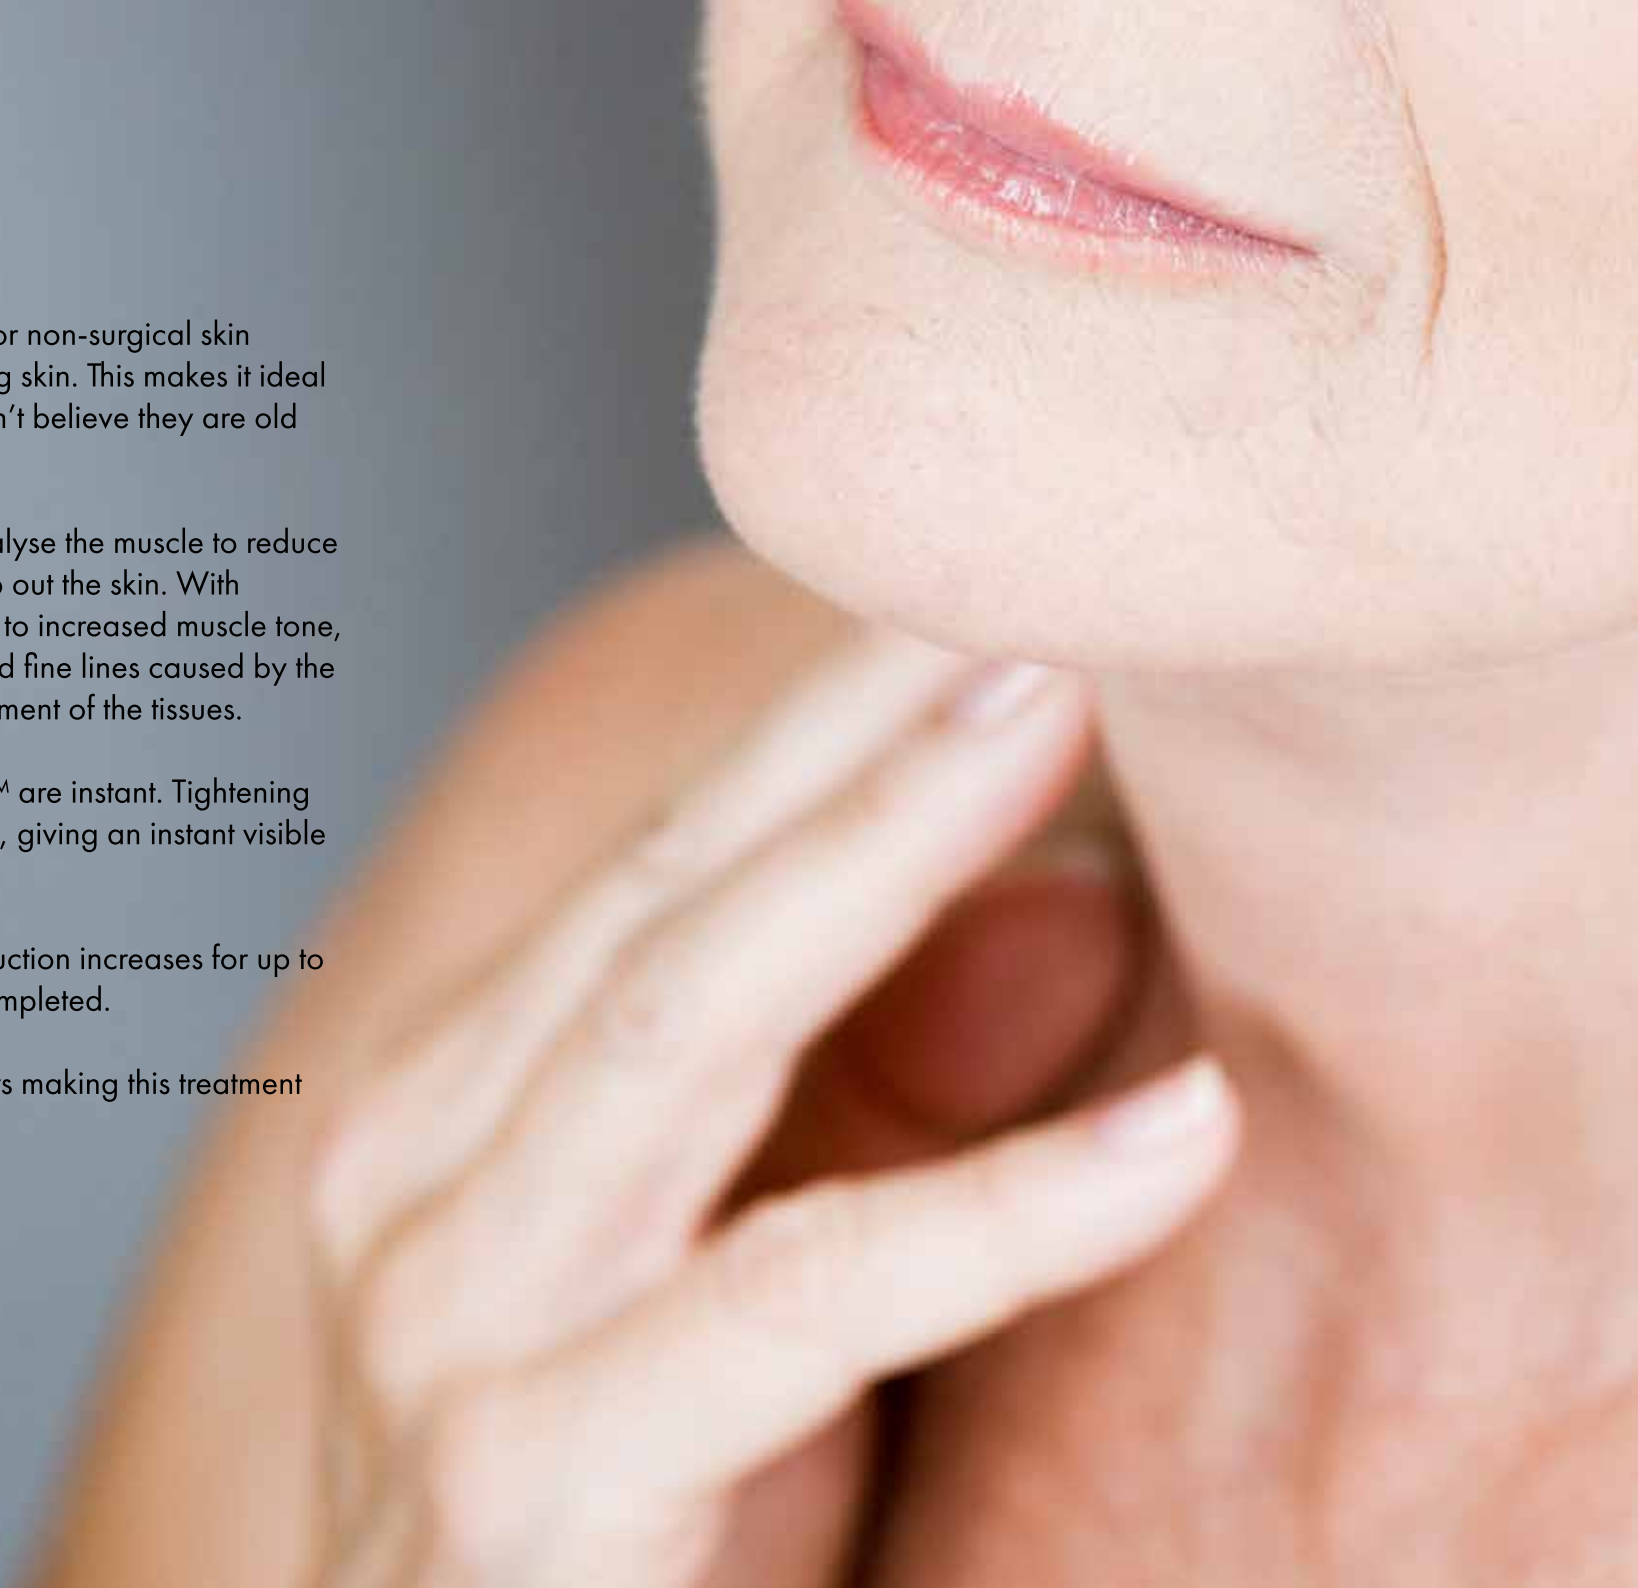

Collagen Lift™ is extremely effective for non-surgical skin tightening and firming loose or sagging skin. This makes it ideal for those who either don't want, or don't believe they are old enough for surgical procedures.

Some Injectables such as Botox™ paralyse the muscle to reduce the appearance of wrinkles and plump out the skin. With Collagen Lift™, you can look forward to increased muscle tone, a more defined jaw line and diminished fine lines caused by the natural tightening effect from a realignment of the tissues.

Results from a course of Collagen Lift™ are instant. Tightening of the elastin fibres occurs immediately, giving an instant visible result.

Over the medium term, collagen production increases for up to 3 months after the course has been completed.

Long term, results can last up to 2 years making this treatment serious competition for Botox™.

## 4 simple steps to the Collagen Lift™ treatment

- 1.** The treatment area is cleansed and exfoliated.
- 2.** A conducting gel is applied to clean skin on the area to be treated.
- 3.** A heated ceramic wand is moved continuously over the skin in circular motions on the treatment area warming the skin.
- 4.** After treatment, the area is cleansed again to remove any conducting gel and a soothing moisturiser and SPF applied to the area.

## What areas can be treated?

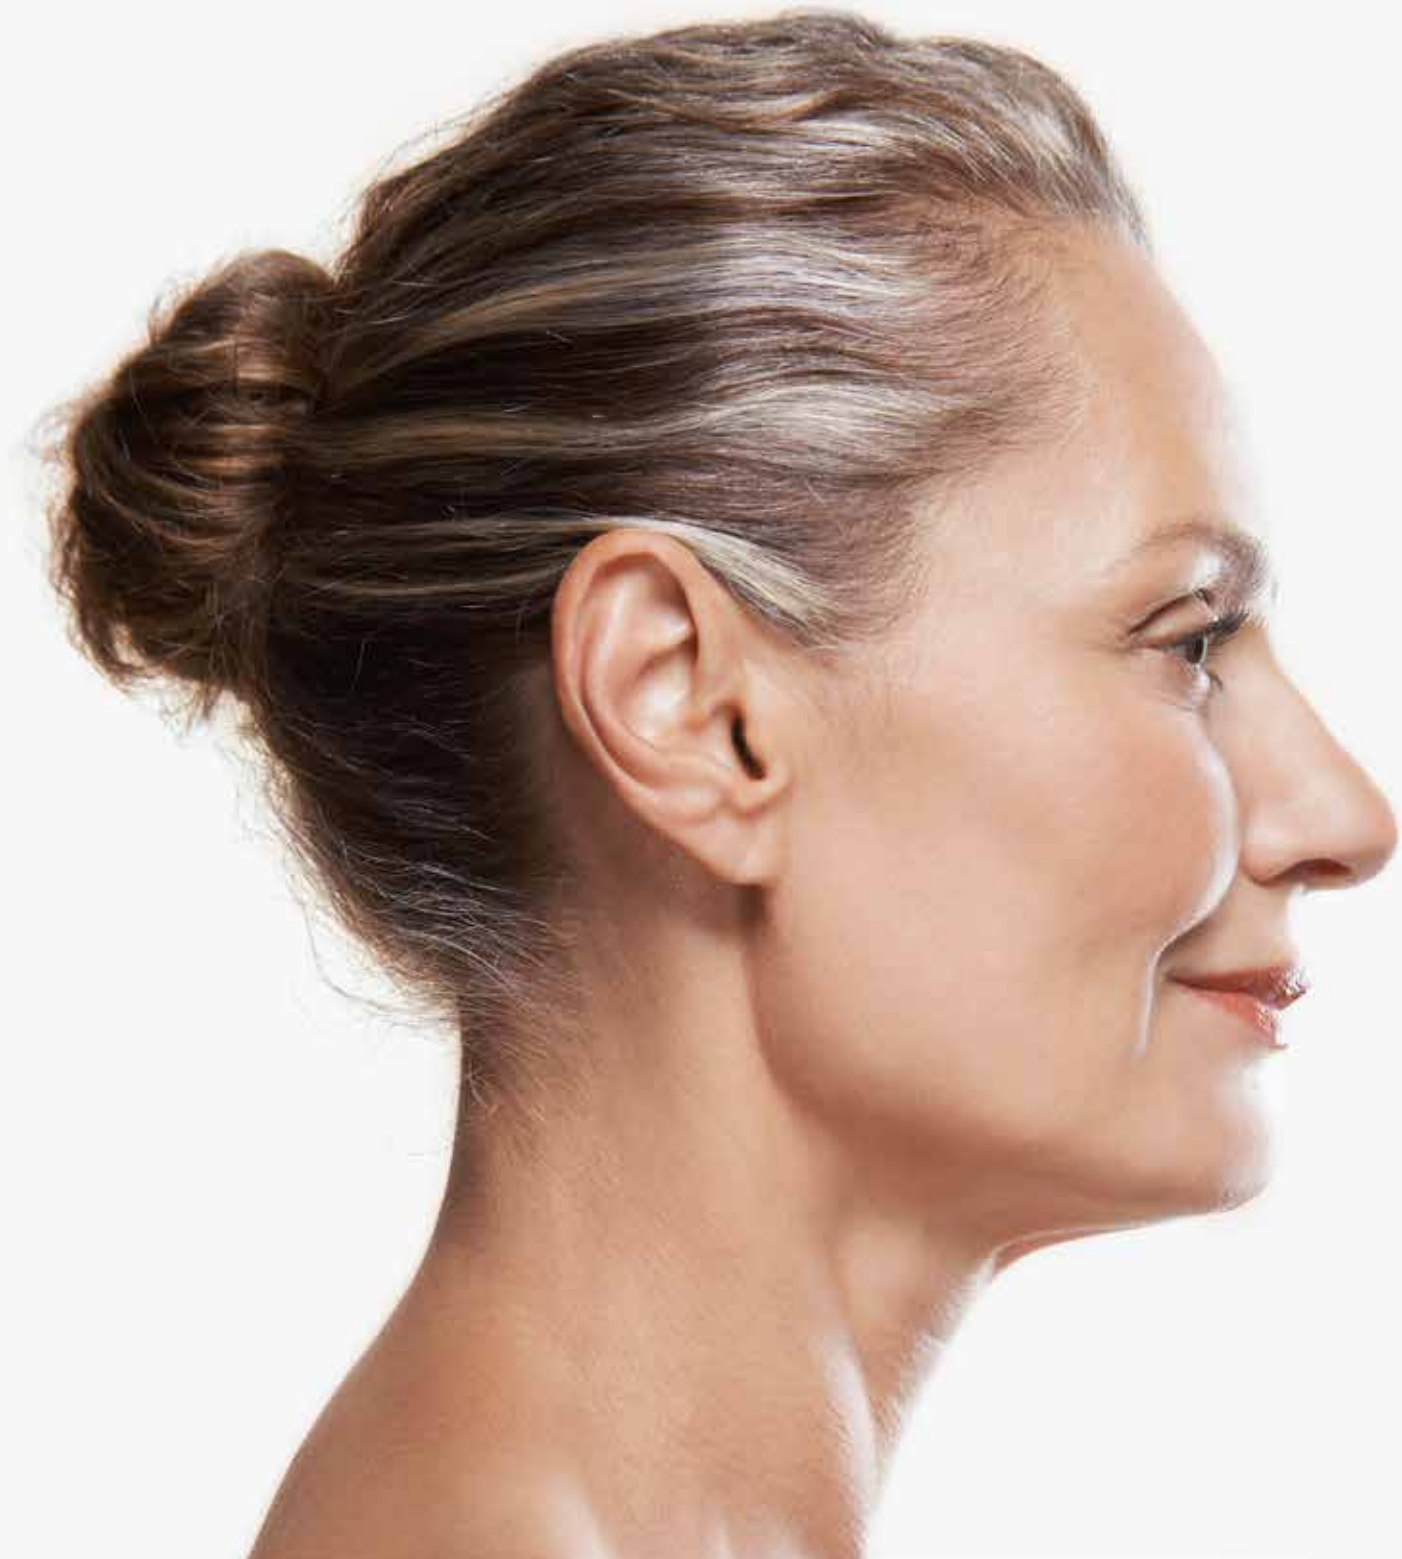

Collagen Lift™ is not just a facial treatment and can be used on other areas of the body too. Collagen Lift™ remodels, tones and builds; rejuvenating & tightening skin and acting on cellulite.

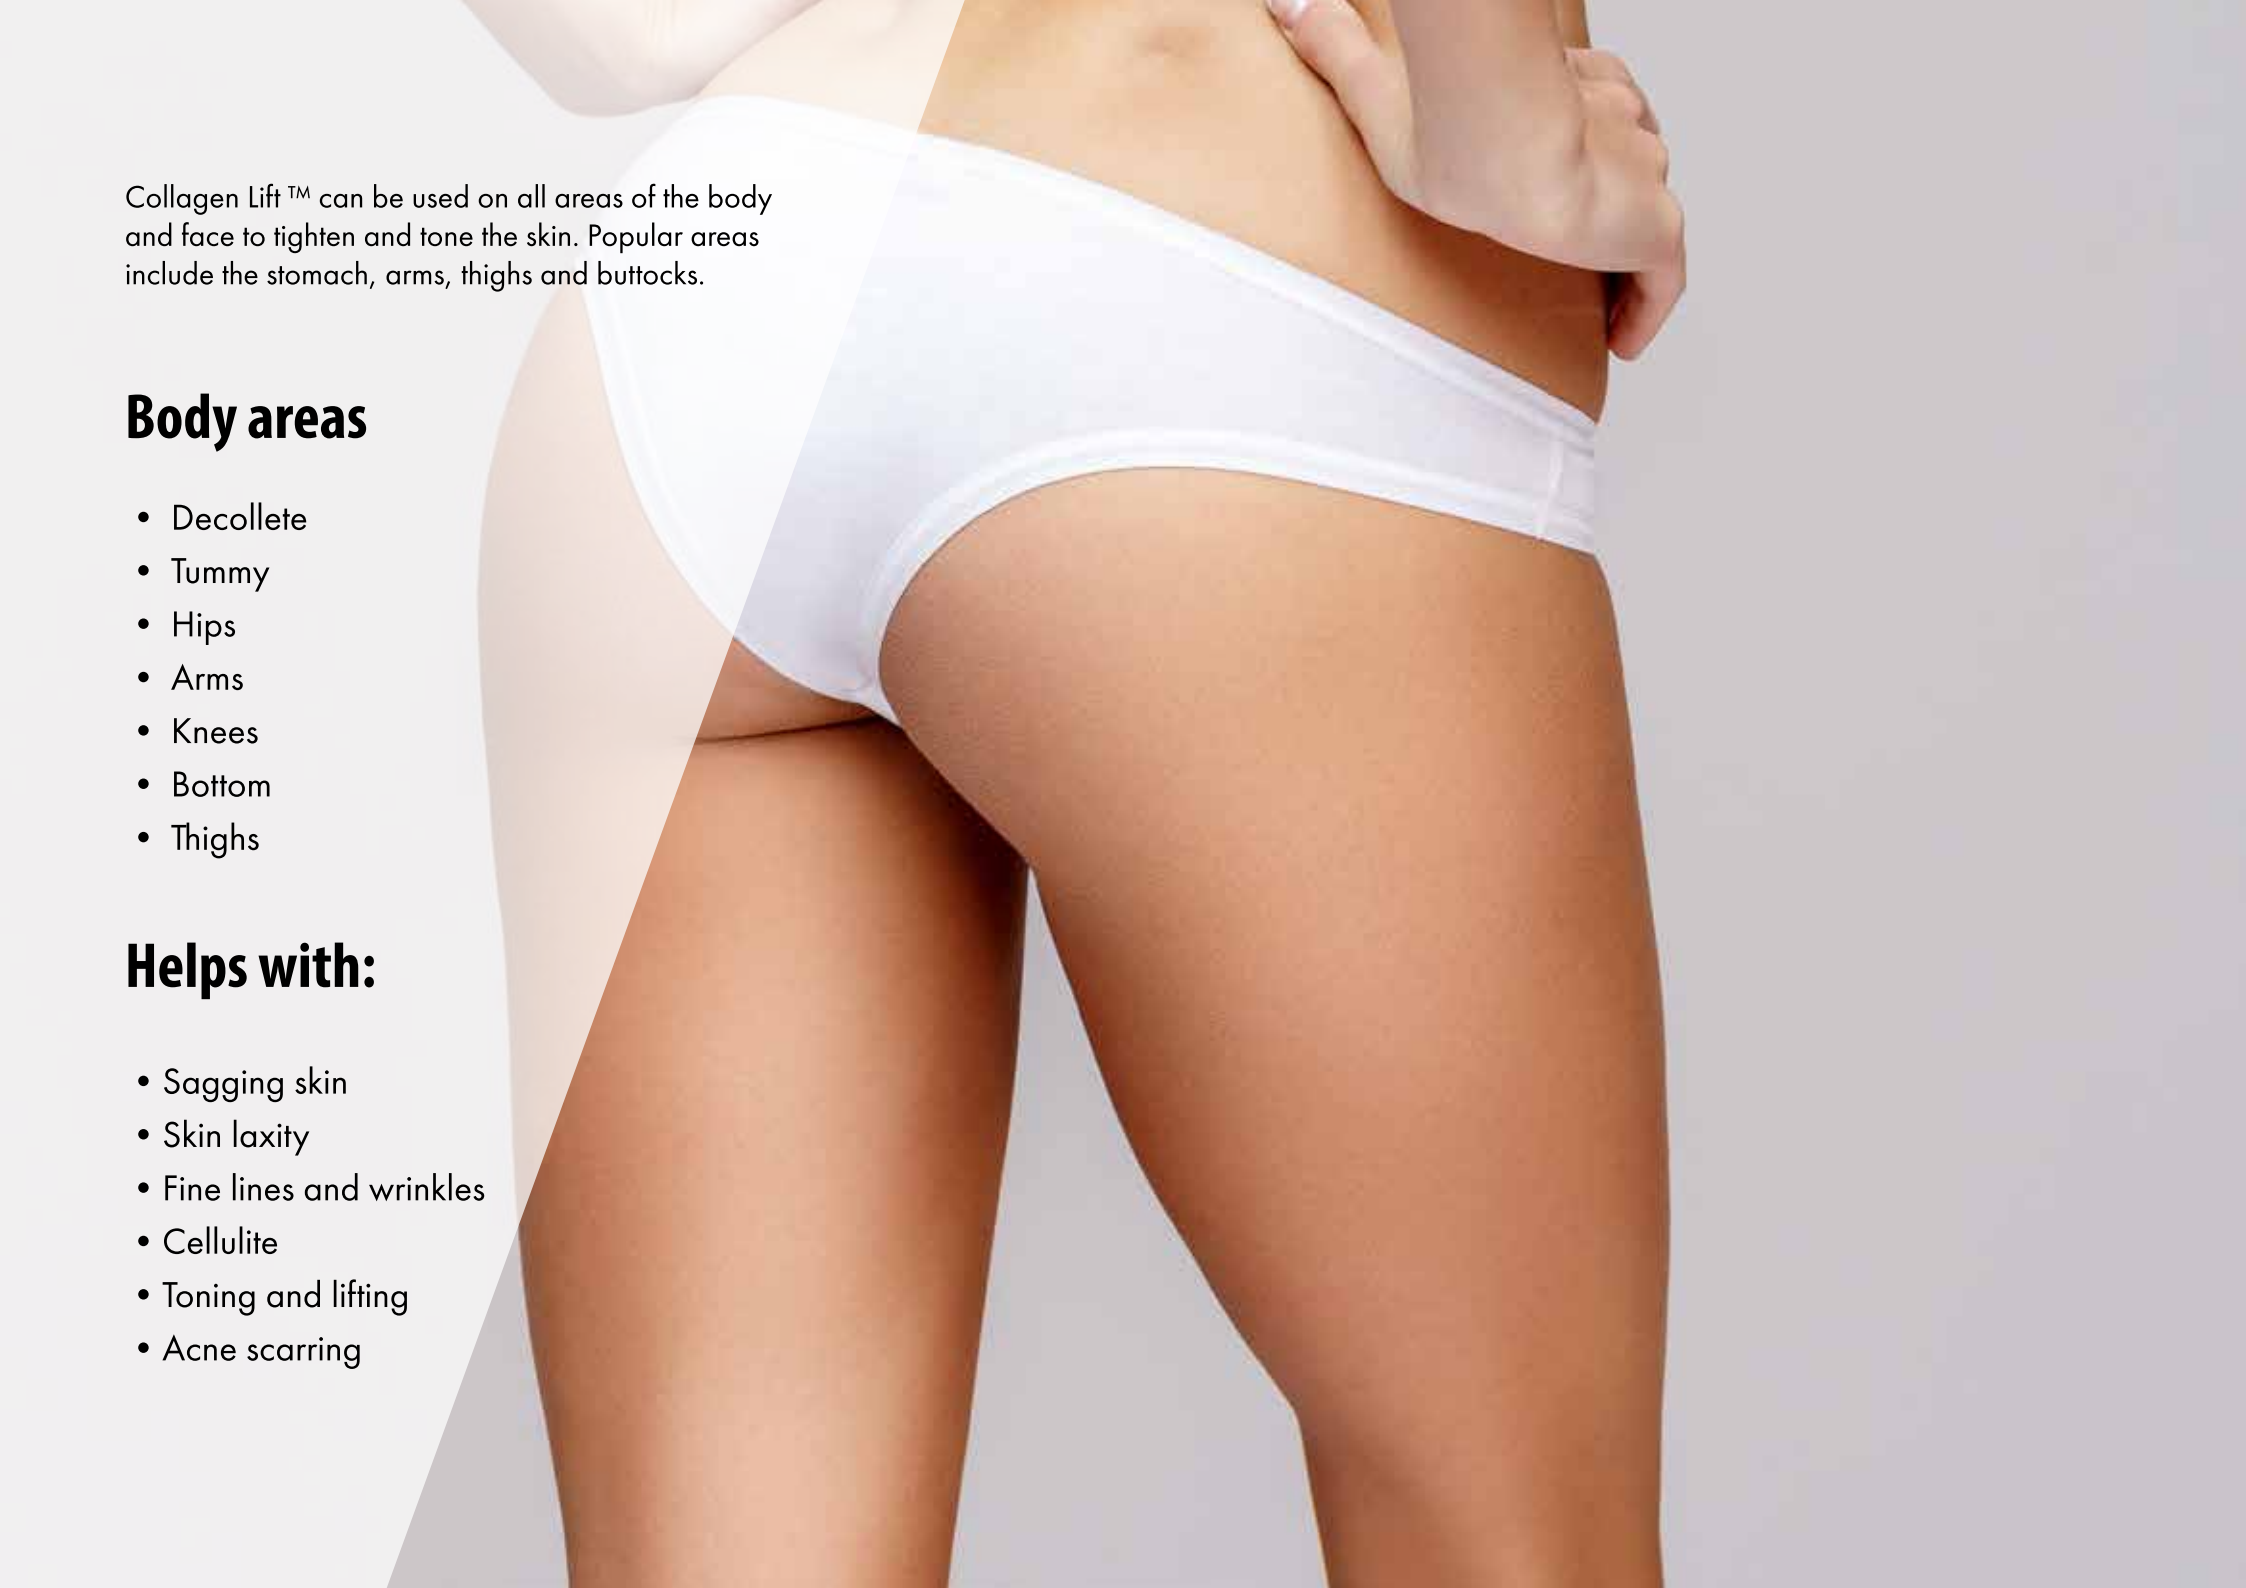

### Facial areas:

- Around the eyes
- Face
- Neck
- Marionette lines
- Frown lines
- Jowls

### Helps with:

- Sagging skin  
*e.g. jowls, jawline and neck*
- Skin laxity
- Fine lines and wrinkles
- Uneven skin texture
- Acne scarring

Collagen Lift™ can be used on all areas of the body and face to tighten and tone the skin. Popular areas include the stomach, arms, thighs and buttocks.

## Body areas

- Decollete
- Tummy
- Hips
- Arms
- Knees
- Bottom
- Thighs

## Helps with:

- Sagging skin
- Skin laxity
- Fine lines and wrinkles
- Cellulite
- Toning and lifting
- Acne scarring

## Benefits of Collagen Lift™

- Tones and tightens skin
- Reduces cellulite
- Immediate results
- Softens fine lines
- Non-invasive
- Stimulates collagen, elastin and hyaluronic acid
- Painless and relaxing
- Jowl lifting
- Wrinkle reduction
- Increases cell metabolism
- Improvements can be seen for up to 3 months
- Results last up to 2 years
- Relaxing treatment

## Who's it for

Anyone with a need for skin tightening will benefit from this treatment. Skin usually begins to sag and lose collagen during our late 20's and every year our body will produce about 1% less collagen. The treatment can be performed on any skin colour and skin type.

## Frequently asked questions

### **How many treatments will I need and how often?**

We recommend a course of six sessions completed either; one a week for six weeks, or two a week for three weeks. After this we suggest a single session every 4-6 weeks to maintain the results. Top up courses of six treatments are recommended every 2 years.

### **Is it painful?**

No, it isn't painful at all. The heat and speed of the treatment can be adjusted to ensure your comfort throughout. The temperature should be set as high as is comfortable for you in order to achieve the best results.

### **What does Collagen Lift™ treatment feel like?**

During the Collagen Lift™ treatment a conductive gel is applied to the skin and then a ceramic wand is moved continuously over the skin in a circular motion. The feeling is described as soothing and relaxing like a warm wand being massaged over the skin. Very similar to a hot stones massage.

### **How quickly will I see results?**

Results from a course of Collagen Lift™ treatments are instant. Tightening of the elastin fibres occurs immediately, giving an instant visible result.

### **How long will the results last for?**

Over the medium term you will benefit from increased collagen production up to 3 months after the course has been completed. Long term, results can last up to 2 years making this treatment serious competition for Botox™.
